## **The Concept of Modernism** Astradur Eysteinnsson

The term "modernism" is central to any discussion of twentieth-century literature and critical theory. Astradur Eysteinnsson here maintains that the concept of modernism does not emerge directly from the literature it subsumes, but is in fact a product of critical practices relating to nontraditional literature. Intervening in these practices, and correlating them with modernist works and with modern literary theory, Eysteinnsson undertakes a comprehensive reexamination of the idea of modernism.
