## Abiotic Stress Physiology of Horticultural Crops

This book brings together recent advances in the area of abiotic stress tolerance in various vegetables, fruit crops, plantation crops and tuber crops. The main challenges to improving the productivity of horticultural crops are the different types of abiotic stresses generally caused by climate change at the regional and global level. Heat, drought, cold and salinity are the major abiotic stresses that adversely affect growth and productivity and can trigger a series of morphological, physiological, biochemical and molecular changes in various horticultural crops.

To date, there are no books covering horticultural crop-specific abiotic stress tolerance mechanisms and their management. Addressing that gap, the book is divided into 2 sections, the first of which highlights recent advances in the general aspects of abiotic stress tolerance like the role of hormones, reactive oxygen species, seed treatments, molecular mechanisms of heat tolerance and heavy metal toxicity, while the second focuses on the abiotic stress tolerance mechanisms of various vegetables, fruit crops, plantation crops and tuber crops. It includes comprehensive discussions of fruit crops like mango, grapes, banana, litchi and arid zone fruits; vegetables crops like tomato, capsicum, onion and tuber crops; and plantation crops like coconut, areca nut, oil palm and black pepper. Among the strategies for plant stress survival, examples of both avoidance and tolerance relevant to particular crops are examined in detail, supported by selected comprehensive case studies of progress. As such, the book offers a valuable resource suited for scientists and graduate students working in the fields of crop improvement, genetic engineering, and the abiotic stress tolerance of horticultural crops.

### From reader reviews:

#### **Martina White:**

The book Abiotic Stress Physiology of Horticultural Crops can give more knowledge and also the precise product information about everything you want. Why then must we leave the good thing like a book Abiotic Stress Physiology of Horticultural Crops? Wide variety you have a different opinion about reserve. But one aim which book can give many info for us. It is absolutely suitable. Right now, try to closer using your book. Knowledge or information that you take for that, you are able to give for each other; you are able to share all of these. Book Abiotic Stress Physiology of Horticultural Crops has simple shape however you know: it has great and big function for you. You can appear the enormous world by start and read a e-book. So it is very wonderful.

#### **Ellen McNulty:**

The book with title Abiotic Stress Physiology of Horticultural Crops has lot of information that you can find out it. You can get a lot of profit after read this book. That book exist new information the information that exist in this reserve represented the condition of the world now. That is important to you to know how the improvement of the world. This book will bring you inside new era of the syndication. You can read the e-book on your own smart phone, so you can read that anywhere you want.

#### **Laura McLaughlin:**

Abiotic Stress Physiology of Horticultural Crops can be one of your starter books that are good idea. All of us recommend that straight away because this reserve has good vocabulary which could increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The copy writer giving his/her effort that will put every word into joy arrangement in writing Abiotic Stress Physiology of Horticultural Crops however doesn't forget the main stage, giving the reader the hottest along with based confirm resource facts that maybe you can be one among it. This great information could drawn you into fresh stage of crucial imagining.

#### **David Paras:**

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you find out the inside because don't assess book by its deal with may doesn't work this is difficult job because you are frightened that the inside maybe not since fantastic as in the outside appearance likes. Maybe you answer can be Abiotic Stress Physiology of Horticultural Crops why because the great cover that make you consider concerning the content will not disappoint you. The inside or content is fantastic as the outside or maybe cover. Your reading sixth sense will directly show you to pick up this book.
