Joining of Materials and Structures: From Pragmatic Process to Enabling Technology

Robert W. Messler

Joining of Materials and Structures: From Pragmatic Process to Enabling Technology Robert W. Messler

Joining of Materials and Structures is the first and only complete and highly readable treatment of the options for joining conventional materials and the structures they comprise in conventional and unconventional ways, and for joining emerging materials and structures in novel ways. Joining by mechanical fasteners, integral designed-or formed-in features, adhesives, welding, brazing, soldering, thermal spraying, and hybrid processes are addressed as processes and technologies, as are issues associated with the joining of metals, ceramics (including cement and concrete) glass, plastics, and composites (including wood), as well as, for the first time anywhere, living tissue.

While focused on materials issues, issues related to joint design, production processing, quality assurance, process economics, and joint performance in service are not ignored. The book is written for engineers, from an in-training student to a seasoned practitioner by an engineer who chose to teach after years of practice. By reading and referring to this book, the solutions to joining problems will be within one's grasp.

Key Features:

- Unprecedented coverage of all joining options (from lashings to lasers) in 10 chapters
 - Uniquely complete coverage of all materials, including living tissues, in 6 chapters
 - Richly illustrated with 76 photographs and 233 illustrations or plots
 - Practice Questions and Problems for use as a text of for reviewing to aid for comprehension
- * Coverage all of major joining technologies, including welding, soldering, brazing, adhesive and cement bonding, pressure fusion, riveting, bolting, snap-fits, and more
- * Organized by both joining techniques and materials types, including metals, non-metals, ceramics and glasses, composites, biomaterials, and living tissue
- * An ideal reference for design engineers, students, package and product designers, manufacturers, machinists, materials scientists

From reader reviews:

Stephen Stover:

Do you have favorite book? Should you have, what is your favorite's book? E-book is very important thing for us to find out everything in the world. Each guide has different aim or maybe goal; it means that e-book has different type. Some people feel enjoy to spend their time to read a book. They are really reading whatever they have because their hobby is reading a book. Think about the person who don't like reading a book? Sometime, particular person feel need book whenever they found difficult problem or exercise. Well, probably you will want this Joining of Materials and Structures: From Pragmatic Process to Enabling Technology.

Mary Rohe:

This book untitled Joining of Materials and Structures: From Pragmatic Process to Enabling Technology to be one of several books which best seller in this year, that is because when you read this book you can get a lot of benefit in it. You will easily to buy this specific book in the book store or you can order it through online. The publisher of this book sells the e-book too. It makes you easier to read this book, because you can read this book in your Cell phone. So there is no reason to you to past this publication from your list.

Jerry Carley:

The publication with title Joining of Materials and Structures: From Pragmatic Process to Enabling Technology has a lot of information that you can find out it. You can get a lot of advantage after read this book. This kind of book exist new know-how the information that exist in this reserve represented the condition of the world currently. That is important to yo7u to be aware of how the improvement of the world. This book will bring you within new era of the internationalization. You can read the e-book in your smart phone, so you can read the item anywhere you want.

Stephanie Armstrong:

Don't be worry for anyone who is afraid that this book can filled the space in your house, you can have it in e-book way, more simple and reachable. This particular Joining of Materials and Structures: From Pragmatic Process to Enabling Technology can give you a lot of close friends because by you investigating this one book you have matter that they don't and make a person more like an interesting person. This specific book can be one of a step for you to get success. This reserve offer you information that probably your friend doesn't know, by knowing more than different make you to be great individuals. So , why hesitate? Let's have Joining of Materials and Structures: From Pragmatic Process to Enabling Technology.
