Dr Shuker's Casebook KARL P.N. SHUKER

Although he is best-known for his extensive cryptozoological researches and publications, Dr Karl Shuker has also investigated a very diverse range of other anomalies and unexplained phenomena, both in the literature and in the field. Travelling the world in search of mysteries and marvels of every kind, Dr Shuker has climbed the volcanic slopes of Easter Island on the trail of moai and manbirds, he has traversed the Theban necropolis of Egypt's West Bank in search of a singing Colossus and the head of Ozymandias, he has journeyed to Woolpit in the footsteps of its mystifying Green Children, and to Niagara on the lookout for its long-lost winged cat. Whether it be flying over the Bermuda Triangle (four times!), inspecting cropfield circles in Buckinghamshire, questing for mermaids and unicorns, gazing in awe at a putative living dinosaur emblazoned upon the magnificent Ishtar Gate of Babylon's King Nebuchadnezzar, revealing a bizarre yet hitherto-undocumented bat-winged monster encountered in the heartland of Kent, uncovering an anachronistic Cambodian stegosaur at Angkor Wat, peering in hope across the dark waters of Loch Ness and the monster-haunted lakes of Iceland, seeking resurrected avifauna in New Zealand, finding solace in the stark majesty of Stonehenge and the holy grandeur of Lourdes, charting the preternatural entities of Senegambia's forests or Australia's Dreamtime, tracking elusive black panthers on Exmoor, or unmasking serpent-necked panthers on an enigmatic artefact from the ancient Middle East, if there are mysteries to be investigated, Dr Shuker is in hot pursuit. Now, compiled here for the very first time, are some of the extraordinary cases that he has re-examined or personally explored down through the years - from sky beasts and reptoids, statues that weep, bleed, and even come to life, vanishing planets and invisible saints, frog rain and angel hair, and the world's weirdest ghosts and aliens, to a chiming tower of porcelain and a talking head of brass, spooklights and foo fighters, Herne the Hunter and photographed thought-forms, the chirping pyramid of Quetzalcoatl, magical mirrii dogs Down Under, and the most comprehensive study ever published of winged cats in which he successfully unveils their long-debated cryptic identity. All of that, and much more, await you inside this arcane archive of inexplicabilia, dubitanda, and mirabilia or, as we prefer to call it, Dr Shuker's Casebook.
