## **The Technology Of God: A Quest For The Secret Of Creation (Volume 1)** Ms Aleya Annaton

The Technology of God is a science fiction metaphysical thriller, based on the real life theory of award-winning physicist Nassim Hamein. This unification theory is rocking the world of science and religion as it offers a complete scientific understanding of both the physical and spiritual expressions of creation. Aleya Annaton, Emissary of Hamein's Resonance Project Foundation, has masterfully woven the elements of this profound new understanding of our universe into a thrilling romantic adventure. The story is set in a near future America, controlled by an extreme fundamentalist religious faction that has taken over the government. Physicist Dr. Alex Harmon, along with his colleague and lover, the beautiful Sydney Stewart, are seeking a theory that would unlock the secrets of creation... a forbidden subject under the new religious law. Believing the physics of space-time was encoded into the world's religious traditions, they set out to decipher clues passed down in manuscripts, secret societies, and monuments around the world. When they discover the universe works in ways contrary to mainstream science as well as the prevailing religious doctrine, they are thrust into the crosshairs of the tyrannical leader of the new religious state. As they set out to build a technology to access a mysterious realm they believe underlies all of physical creation, they must negotiate a world of political intrigue, ancient initiation, love, betrayal and contact with Beings from other worlds. What they find at the end of their quest is no less than the answers to the most intriguing questions man has pondered since he first gazed at the stars.
