The Weibull Distribution: A Handbook Horst Rinne

The Most Comprehensive Book on the Subject

Chronicles the Development of the Weibull Distribution in Statistical Theory and Applied Statistics

Exploring one of the most important distributions in statistics, **The Weibull Distribution: A Handbook** focuses on its origin, statistical properties, and related distributions. The book also presents various approaches to estimate the parameters of the Weibull distribution under all possible situations of sampling data as well as approaches to parameter and goodness-of-fit testing.

Describes the Statistical Methods, Concepts, Theories, and Applications of This Distribution

Compiling findings from dozens of scientific journals and hundreds of research papers, the author first gives a careful and thorough mathematical description of the Weibull distribution and all of its features. He then deals with Weibull analysis, using classical and Bayesian approaches along with graphical and linear maximum likelihood techniques to estimate the three Weibull parameters. The author also explores the inference of Weibull processes, Weibull parameter testing, and different types of goodness-of-fit tests and methods.

Successfully Apply the Weibull Model

By using inferential procedures for estimating, testing, forecasting, and simulating data, this self-contained, detailed handbook shows how to solve statistical life science and engineering problems.

From reader reviews:

Anthony Rodriguez:

Typically the book The Weibull Distribution: A Handbook has a lot info on it. So when you check out this book you can get a lot of gain. The book was authored by the very famous author. This articles author makes some research ahead of write this book. This book very easy to read you will get the point easily after looking over this book.

Alfred Leahy:

Precisely why? Because this The Weibull Distribution: A Handbook is an unordinary book that the inside of the guide waiting for you to snap this but latter it will zap you with the secret the item inside. Reading this book next to it was fantastic author who also write the book in such incredible way makes the content within easier to understand, entertaining means but still convey the meaning completely.
