Construction Materials, Methods and Techniques William P. Spence

Delmar presents the one complete reference for architects, civil engineers, construction engineers--virtually everyone involved in the building trades. Organized by CSI divisions II to XVI, this practical book covers all current materials and their applications in commercial and residential buildings. Carpentry chapters pay special attention to light-frame construction with both wood and metal; additional chapters cover plumbing, HVAC, electrical, and other critical systems. Almost 2,000 drawings and photographs bring the information to life, while metric charts provide the perfect resource for quick calculations. A vital part of every professional's library!
