## **SAT II Math with TI** Rusen Meylani

This book is intended to help high school students who are bound to take either or both of the SAT II Mathematics IC and IIC tests. Book 1 is devoted to the usage of the TI – 83 Plus Graphing calculator, particularly in the context of Algebra, Pre-Calculus and SAT II and IB Mathematics with over 300 questions carefully designed and fully solved questions. The method proposed in this book has been developed through 5 years' experience; has been proven to work and has created a success story each and every time it was used, having helped hundreds of students who are currently attending the top 50 universities in the USA, that include many Ivy League schools as well.

The main advantage of the approach suggested in this book is that, **YOU CAN SOLVE, ANY TYPE OF EQUATION OR INEQUALITY** with the TI, whether it is algebraic, trigonometric, exponential, logarithmic, polynomial or one that involves absolute values, **WITHOUT NEEDING TO KNOW THE RELATED TOPIC IN DEPTH** and having to perform tedious steps; you can solve all types of equations and inequalities very easily and in a very similar way **JUST NEEDING TO LEARN A FEW VERY EASY TO REMEMBER TECHNIQUES**. But there are still more to what you can do with the TI; find period, frequency, amplitude, offset, axis of wave of a periodic function, find the maxima minima and zeros as well as the domains and ranges of all types of functions; perform any operations on complex numbers, carry out any computation involving sequences and series, perform matrix algebra, solve a system of equations for any number of unknowns and even write small programs to ease your life. More than 20 of the 50 questions in the SAT II Mathematics tests are based on the topics we just have given and this is why this book will definitely raise your SAT II Mathematics scores by at least 200 points.

The topics that are listed above are typically what a student learns at high school algebra classes. This book is intended to fulfill the need for a book specifically designed for an SAT bound college senior who wishes to score perfectly on the SAT II math tests in a very short period of time.
