Rethinking Interdisciplinarity across the Social Sciences and Neurosciences

Felicity Callard, Des Fitzgerald

Rethinking Interdisciplinarity across the Social Sciences and Neurosciences Felicity Callard, Des Fitzgerald

This book offers a provocative account of interdisciplinary research across the neurosciences, social sciences and humanities. Setting itself against standard accounts of interdisciplinary 'integration,' and rooting itself in the authors' own experiences, the book establishes a radical agenda for collaboration across these disciplines. *Rethinking Interdisciplinarity* does not merely advocate interdisciplinary research, but attends to the hitherto tacit pragmatics, affects, power dynamics, and spatial logics in which that research is enfolded.

Understanding the complex relationships between brains, minds, and environments requires a delicate, playful and genuinely experimental interdisciplinarity, and this book shows us how it can be done.

This book is open access under a CC-BY license and funded by The Wellcome Trust.
