## Mathematics and Politics: Strategy, Voting, Power and Proof (Textbooks in Mathematical Sciences)

Alan D. Taylor

interest in a particular application, however, often depends on his or her general interest in the area in which the application is taking place. My experience at Union College has been that there is a real advantage in having students enter the course knowing that virtually all the applications will focus on a single discipline—in this case, political science. The level of presentation assumes no college-level mathematical or social science prerequisites. The philosophy underlying the approach we have taken in this book is based on the sense that we (mathematicians) have tended to make two errors in teaching non-science students: we have overestimated their comfort with computational material, and we have underestimated their ability to handle conceptual material. Thus, while there is very little algebra (and certainly no calculus) in our presentation, we have included numerous logical arguments that students in the humanities and the social sciences will find accessible, but not trivial. The book contains five main topics: a model of escalation, game theoretic models of international conflict, yes-no voting systems, political power, and social choice. The first part of the text is made up of a single chapter devoted to each topic. The second part of the text revisits each topic, again with a single chapter devoted to each. The organization of the book is based on pedagogical considerations, with the material becoming somewhat more sophisticated as one moves through the ten chapters. On the other hand, within any given chapter there is little reliance on material from earlier chapters, except for those devoted to the same topic.

### **From reader reviews:**

#### **Lacey Clements:**

The particular book Mathematics and Politics: Strategy, Voting, Power and Proof (Textbooks in Mathematical Sciences) will bring one to the new experience of reading a book. The author style to elucidate the idea is very unique. When you try to find new book to read, this book very ideal to you. The book Mathematics and Politics: Strategy, Voting, Power and Proof (Textbooks in Mathematical Sciences) is much recommended to you to read. You can also get the e-book in the official web site, so you can quickly to read the book.

#### **Cheryl Phelps:**

The reserve with title Mathematics and Politics: Strategy, Voting, Power and Proof (Textbooks in Mathematical Sciences) has a lot of information that you can discover it. You can get a lot of gain after read this book. This kind of book exist new know-how the information that exist in this book represented the condition of the world now. That is important to you to understand how the improvement of the world. This particular book will bring you with new era of the glowbal growth. You can read the e-book on your smart phone, so you can read this anywhere you want.

#### **Eric Green:**

People live in this new moment of lifestyle always aim to and must have the extra time or they will get wide range of stress from both way of life and work. So , when we ask do people have free time, we will say absolutely of course. People is human not only a robot. Then we consult again, what kind of activity are there when the spare time coming to a person of course your answer will probably unlimited right. Then ever try this one, reading ebooks. It can be your alternative throughout spending your spare time, typically the book you have read is actually Mathematics and Politics: Strategy, Voting, Power and Proof (Textbooks in Mathematical Sciences).

#### **Sheri Combs:**

Don't be worry in case you are afraid that this book can filled the space in your house, you may have it in e-book approach, more simple and reachable. That Mathematics and Politics: Strategy, Voting, Power and Proof (Textbooks in Mathematical Sciences) can give you a lot of friends because by you looking at this one book you have matter that they don't and make you more like an interesting person. This specific book can be one of one step for you to get success. This reserve offer you information that probably your friend doesn't know, by knowing more than different make you to be great men and women. So , why hesitate? Let us have Mathematics and Politics: Strategy, Voting, Power and Proof (Textbooks in Mathematical Sciences).
