## **MooTools 1.3 Cookbook** Jay Johnston

Over 110 highly effective recipes to turbo-charge the user interface of any web-enabled Internet application and web page

- Code snippets that work directly out of the box on all major web browsers
- Master smooth animations without complex code nor the need for advanced JavaScript knowledge
- An ideal accompaniment to any tutorial, this book provides instant answers to common problems

### **In Detail**

MooTools is a JavaScript framework that abstracts the JavaScript language. JavaScript itself, complex in syntax, provides the tools to write a layer of content interaction for each different browser. MooTools abstracts those individual, browser-specific layers to allow cross-browser scripting in an easy-to-read and easy-to-remember syntax.

Animation and interaction, once the domain of Flash, are being taken by storm by the MooTools JavaScript framework, which can cause size, shape, color, and opacity to transition smoothly. Discover how to use AJAX to bring data to today's web page users who demand interactivity without clunky page refreshes. When searching for animation and interactivity solutions that work, MooTools 1.3 Cookbook has individual, reusable code examples that get you running fast!

MooTools 1.3 Cookbook readies programmers to animate, perform AJAX, and attach event listeners in a simple format where each section provides a clear and cross-browser compatible sketch of how to solve a problem, whether reading from beginning to finish or browsing directly to a particular recipe solution.

MooTools 1.3 Cookbook provides instant solutions to MooTools problems - whatever you want to do with MooTools, this book will tell you how to do it.

MooTools 1.3 Cookbook is presented in a progressive order that builds concepts and ideas, while simultaneously being a collection of powerful individual, standalone, recipe solutions.

### **What you will learn from this book**

- Change HTML with working examples of finding, moving, adding, and removing elements and groups of elements
- Create HTML elements like iframes, a tags, and form elements and inject them into tables, table rows, and div elements
- Animate the Internet with morphs, tweens, slides, and scrolls
- Make thumbnails scroll and your users drool!
- Fire remote AJAX calls, on page, bringing them into the Web 2.0 arena where user interfaces are cool and fun
- Find plugins on the Web that extend MooTools and make the most of everything the open-source community has to offer
- Zebra stripe a table, spin an AJAX notification, create sliding volume meters, open a menu accordion style, and more
