The Neutrino Converted Christmas Tree Light-Sail Smorgasbord. Notes On Novel Light-Sail Propulsion Methods. Volume 22. James M Essig

A really strange concept for enhancing starship propulsion velocities and Lorentz factors would involve some ad-hoc mechanism to convert all material components of a starship including crew members bodies to neutrinos relative to the background reference frame through which the spacecraft travel. Since the ratio of the anticipated invariant mass of neutrinos is on average billions of times less than that of protons and neutrons and millions of times less than that of the electron, somehow converting a spacecraft to neutrinoium with respect to the background would automatically result in an increase in spacecraft Lorentz factors on the order of a multiplicative factor of 1 million to 10 billion or more. An important step here would include selective suppression of the neutrino conversion mechanism so that atomic and molecular components do not experience relative runaway velocities or gamma factors. Otherwise, the difference in particular Lorentz factors would likely lead to a shredding of the spacecraft into atomic and sub-atomic debris. Perhaps a field effect mechanism can cover the spacecraft volume at the levels of resolution of between one nanometer to one femtometer or less. Ideally, the mechanism would have a limit of resolution in space and time equal to the Planck Length and Planck Time scales. Another mechanism would include complete conversion of the spacecraft and its contents to neutrino material which done as previously mentioned is referred to as "neutrinoium". For the latter scenario, a mechanism would be required under conditions where the spacecraft would retain its modal identity of interaction with the background while preserving the personal identity of the crew members bodies and personalities. Another mechanism would include a hybrid of relative neutrino conversion and partial conversion of the spacecraft and crew to actual neutrino material. An interesting scenario would involve entanglement of all spacecraft molecular, atomic, and sub-atomic constituents to a relative neutrino state, actual neutrinoium, and/or a combination of the former two mechanisms. Such entanglement may provide a mechanism by which the signal and state distribution of any one or combination of the three subject methods over the entire volume of the spacecraft can be adjusted at the speed of light in the spacecraft reference frame. A Godsend would include the existence of hidden quantum variables which would provide a deeper mechanism to manipulate the spacecraft wave-functions to enable the subject conversions. The following operator will be inserted into all expressions of linear power terms by implication but merely actually inserted into almost all such expressions for brevity and ease of editing this series of books. Moreover, the operator has values which are context specific and thus may take on and in fact do take on different values in different contexts but within the same overall two formulas presented in this series. The value of the operator for instance in expressions for black body background radiation intakes scales as a function of the fourth power of gamma otherwise provided. In some limited cases, the operator represents two or more instantiations of the mechanism. The values of velocity, and gamma, denoted as such in the two lengthy formulas as well as the fractional velocity of light are values as would be without the neutrino-conversion based mechanisms. The operator is a multiplicative factor and dimension-less and is now presented. $\{f[(\text{Cont. Spec.})(\text{Neutrino con. of SC relative to the background}),(\text{Neutrino con. of actual SC}),(\text{Neutrino con. of SC relative to the background \& Neutrino con. of actual SC}),(\text{Field effect and/or Entanglement mechanism})]\}$. To see more of the details, consider purchasing this series of books.

From reader reviews:

Inge Reader:

The knowledge that you get from The Neutrino Converted Christmas Tree Light-Sail Smorgasbord. Notes On Novel Light-Sail Propulsion Methods. Volume 22. may be the more deep you searching the information that hide into the words the more you get thinking about reading it. It doesn't mean that this book is hard to know but The Neutrino Converted Christmas Tree Light-Sail Smorgasbord. Notes On Novel Light-Sail Propulsion Methods. Volume 22. giving you enjoyment feeling of reading. The author conveys their point in particular way that can be understood by simply anyone who read the idea because the author of this book is well-known enough. This book also makes your personal vocabulary increase well. So it is easy to understand then can go with you, both in printed or e-book style are available. We propose you for having this specific The Neutrino Converted Christmas Tree Light-Sail Smorgasbord. Notes On Novel Light-Sail Propulsion Methods. Volume 22. instantly.

Michael Stricklin:

Playing with family within a park, coming to see the coastal world or hanging out with good friends is thing that usually you may have done when you have spare time, in that case why you don't try factor that really opposite from that. 1 activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love The Neutrino Converted Christmas Tree Light-Sail Smorgasbord. Notes On Novel Light-Sail Propulsion Methods. Volume 22., you are able to enjoy both. It is great combination right, you still desire to miss it? What kind of hang-out type is it? Oh can occur its mind hangout folks. What? Still don't understand it, oh come on its referred to as reading friends.

Rachel Leadbetter:

Your reading 6th sense will not betray anyone, why because this The Neutrino Converted Christmas Tree Light-Sail Smorgasbord. Notes On Novel Light-Sail Propulsion Methods. Volume 22. guide written by well-known writer who knows well how to make book that can be understand by anyone who also read the book. Written within good manner for you, dripping every ideas and creating skill only for eliminate your own hunger then you still skepticism The Neutrino Converted Christmas Tree Light-Sail Smorgasbord. Notes On Novel Light-Sail Propulsion Methods. Volume 22. as good book not just by the cover but also from the content. This is one publication that can break don't judge book by its protect, so do you still needing a different sixth sense to pick that!?! Oh come on your examining sixth sense already alerted you so why you have to listening to yet another sixth sense.

Audrey Mack:

Some individuals said that they feel bored stiff when they reading a guide. They are directly felt the item when they get a half areas of the book. You can choose often the book The Neutrino Converted Christmas Tree Light-Sail Smorgasbord. Notes On Novel Light-Sail Propulsion Methods. Volume 22. to make your

personal reading is interesting. Your own personal skill of reading proficiency is developing when you similar to reading. Try to choose simple book to make you enjoy to study it and mingle the feeling about book and reading through especially. It is to be very first opinion for you to like to open up a book and examine it. Beside that the reserve The Neutrino Converted Christmas Tree Light-Sail Smorgasbord. Notes On Novel Light-Sail Propulsion Methods. Volume 22. can to be your brand new friend when you're really feel alone and confuse with the information must you're doing of these time.
